

D-shaped tokamak external VMEC nonlinear high-grid convergence

Nonlinear traces

Grid-refined window means

Gate status: FAIL
common rel. grid diff: 0.201
least-window rel. grid diff: 0.262
allowed grid diff: 0.150
common start fraction: 0.50

Failed metrics:
- common grid difference: 0.201 > 0.15
- least-window grid difference: 0.262 > 0.15

Interpretation:
finite external-VMEC pilot,
but not a transport holdout until
late-window and grid agreement pass.
