

External-VMEC nonlinear holdout runbook

Ranked external-VMEC holdout candidates

Status: BLOCKED
Preferred family: itermodel_external_vmec
Selected next candidate: none
Nearest tracked gap: ITERModel external VMEC nonlinear t250 high-grid convergence
Horizons: 250.0, 350.0, 450.0
Grids: n48:48:48:32:32, n64:64:64:40:40

- Acceptance gate:
- split=holdout
 - passed grid/window convergence
 - post-transient transport window
 - independent of training reference

Claim boundary:
launch plan only; no absolute-flux
predictor is promoted by this panel.
