

Quasilinear Calibration Inputs: Nonlinear Gate Audit

cyclone long window (train)	matched gate: cyclone nonlinear long window
cyclone miller long window (holdout)	matched gate: cyclone miller nonlinear window
hsx nonlinear window (holdout)	matched gate: hsx nonlinear window
w7x nonlinear window (holdout)	matched gate: w7x nonlinear window
dshape external vmec t250 window (holdout)	matched gate: D-shaped tokamak external VMEC nonlinear t250 high-grid convergence
itermodel external vmec t350 window (train)	matched gate: ITERModel external VMEC nonlinear t350 high-grid convergence
updown asym external vmec t450 window (holdout)	matched gate: updown asym external vmec t450
circular external vmec t450 window (holdout)	matched gate: circular external vmec t450
