

VMEC-JAX QA candidate: constraints-only vs SPECTRAX-GK transport residual

Final WOUT iota profiles

Final scalar diagnostics

Bounded VMEC-JAX candidate comparison

Target aspect: 6.0

Target iota profile floor: 0.41

Plumbing passed: True

All WOUT iota profiles above target: False

Any branch optimized: False

Interpretation

- Objective assembly and WOUT writing work.
- Transport branch is trace-safe.
- This small local budget is not an optimized design.
- Longer VMEC-JAX solve + nonlinear audits are next.
