

VMEC/Boozer multi-point aggregate-objective gate: passed

Aggregate FD gate

status: passed
objective: quasilinear_flux
reduction: mean
samples: 4
base: 0.89272
central FD: 100789
response: 2.016e-02
curvature ratio: 6.926e-03

Finite-difference sensitivity through the in-memory VMEC/Boozer/SPECTRAX-GK value path. This is a multi-point reduced linear/QL objective gate, not a nonlinear turbulent transport optimization claim.
