

External-VMec nonlinear holdout runbook

Ranked external-VMec holdout candidates

Status: READY

Preferred family: itermodel_external_vmec

Min launch gamma: 0.02

Selected next candidate: shaped_tokamak_pressure_reference_nc

Nearest tracked gap: ITERModel external VMec nonlinear t250 high-grid convergence

Horizons: 450.0, 650.0

Grids: n64:64:64:40:40, n80:80:80:48:48, n96:96:96:56:56

Acceptance gate:

- split=holdout
- passed grid/window convergence
- post-transient transport window
- independent of training reference

Claim boundary:

launch plan only; no absolute-flux
predictor is promoted by this panel.
