

Quasilinear dataset-sufficiency gate

Validated electrostatic calibration cases

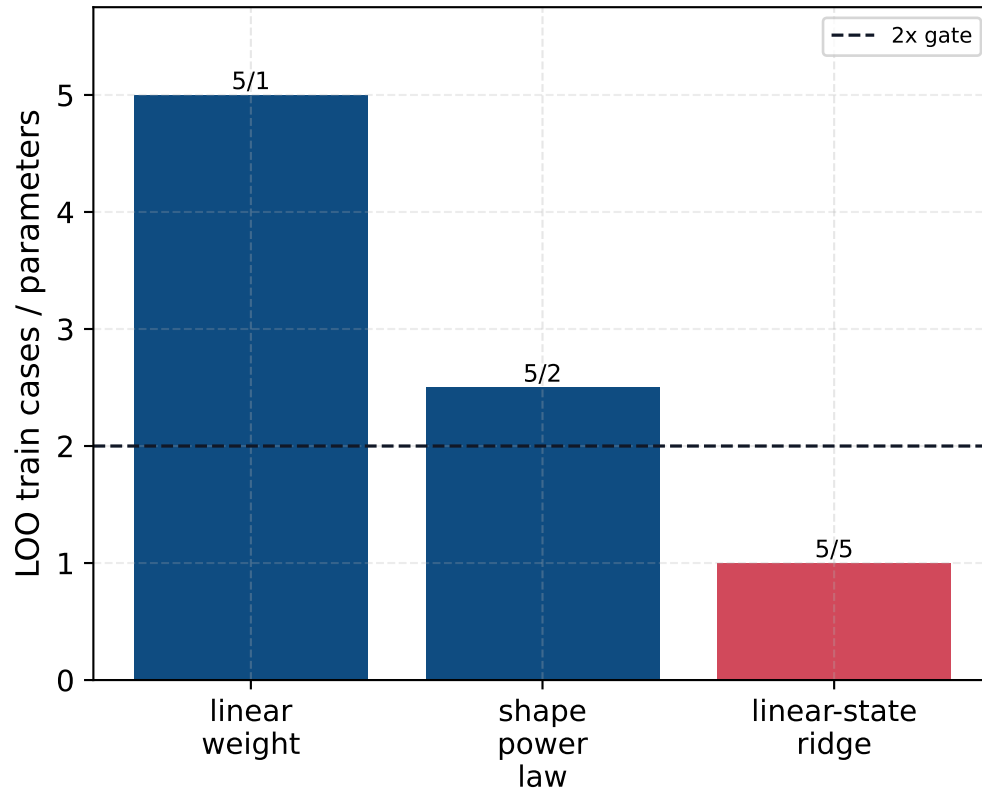

- ✕ cyclone / train
- cyclone_miller / holdout
- hsx / holdout
- w7x / holdout
- dshape_external_vmec / holdout
- itermodel_external_vmec / train

- train
- holdout
- ✕ shape gate failed

Dataset volume requirements

Candidate data-volume guard

Scope and exclusions

Promotion gate: **BLOCKED**

Blockers:

- downstream candidate skill gates not passed

Validated but excluded:

- kbm_nonlinear_window: electromagnetic nonlinear lane; electrostatic quasilinear channels are not promoted
