

VMEC-JAX QA max-mode-5 optimizer sweep with SPECTRAX-GK transport objectives

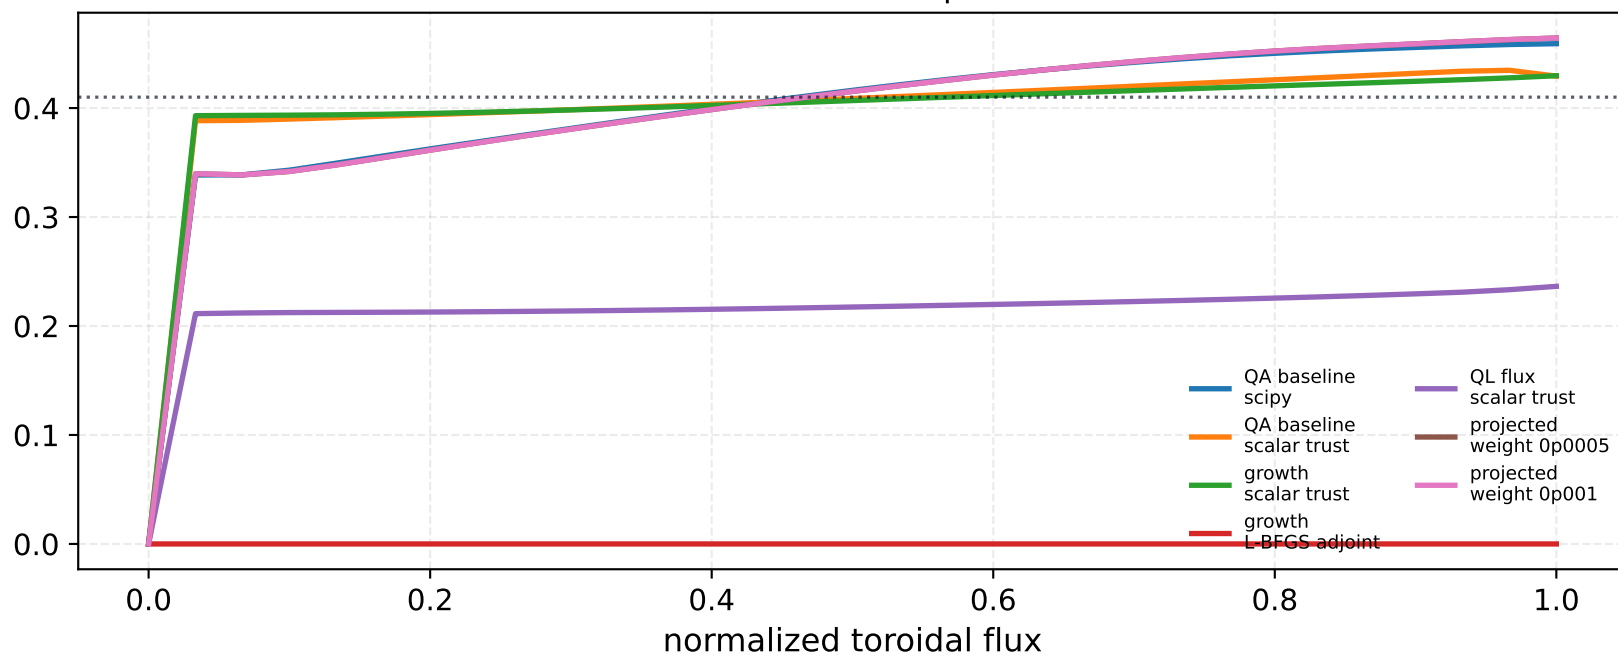

Q(t) status: pending_for_this_sweep; reduced objectives are diagnostics until matched nonlinear audits exist

Solved WOUT iota profiles

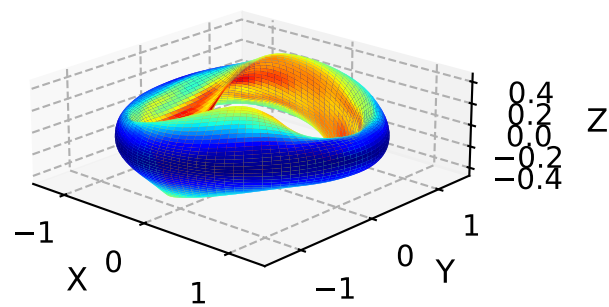

Reduced growth/QL/NL-window objective

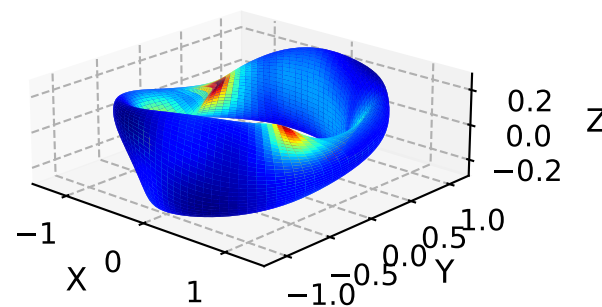

Matched nonlinear heat-flux audits

Pending for this sweep:
run long post-transient SPECTRAX-GK audits
from each completed wout_final.nc before comparing Q(t).
